profile

UI/Visual Designer with experience working in-house and freelance for major eCommerce brands and creative agencies. I love to design fun, frictionless user experiences that combine modern functionality with retro touches.

skills

- work with Claude Code, GitHub, and Vercel to simultaneously design and develop shareable prototypes and code
- design system build out
- create product features that streamline the shopping funnel and drive conversion
- redesign and refresh existing landing pages based on user data and analytics
- create fun and interactive shopping experiences that drive sales and engagement
- build extensive presentation decks to share with cross-functional stakeholders
- design iterations for a/b testing
- work closely with developers from concept to completion
- support, encourage, mentor and train junior designers on my team
- learn and hone new skills
- work on large scale projects with multiple touchpoints from concept to completion
- map user journeys and flows throughout the shopping funnel
